

Socket 3/4" 6-Point – Bahco 8900SM

Durable 3/4" socket from Bahco, manufactured from high-quality alloy steel. The knurled design provides excellent grip for manual fastening, while the polished finish ensures durability and easy maintenance.

The Bahco 3/4" socket with square drive and metric hex profile is designed for professional and general workshop applications. Manufactured from premium alloy steel, it features a high-gloss polished finish that enhances corrosion resistance and extends service life.

The knurled surface allows easy finger tightening of fasteners without resistance, improving convenience during manual assembly tasks. This socket is not suitable for machine use and complies with ISO 2725/1174 and DIN 3124/3120 standards.
