

Socket 1/2" 6-point - Bahco 7800SM

Durable 1/2" socket featuring a square drive, metric hex profile, and Dynamic-Drive™ technology for improved torque transfer and reduced fastener wear. The high-polish finish and knurled grip section ensure comfortable manual operation.

This 1/2" socket is designed for manual fastening applications and manufactured from high-quality steel with a high-polish finish. The metric hex profile incorporates Dynamic-Drive™ technology, providing greater load distribution, increased torque capacity, and reduced wear on fasteners. A knurled surface allows easy finger turning during installation and removal.
